DETAILED ACTION

Information Disclosure Statement

1. Applicant's prior art citation filed July 03, 2003 has been received, considered and placed of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Chabert (U.S. Patent No. 5,353,995).

Chabert teaches a powder atomizer for an installation for the series coating of work pieces with powdered coating material, with a powder e.g. powder-air mixture channel leading through the atomizer to a mouth opening (13, 62) of which the powder channel is fluidly connected to an external line for supplying the atomizer with a mixture of coating powder and air (see Fig. 1). The apparatus includes an additional air channel (43) to introduce additional air (cleaned air supply) into the path of the mixture exiting from the mouth opening of the powder channel. The additional air channel opens out of an annular slit (i.e. shape of a ring) surrounding the opening end of the powder channel (see Fig. 1). The air channel is being fluidly connected with a source of pressurized air; thereby, it is providing cleaning air for preventing powder from accumulating upon the

atomizer (28, 28a) (see fig. 1). Chabert also discloses an atomization bell (58) of which rotates during the coating (col. 3, lines 35-39). Methods followed by an apparatus.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hubbell et al., Fabre, Probst, Dijkhuizen, Schotland, Graham, Williams et al. and Felici et al. are cited of general interest.
